The 'Turn-All' is an automatic mattress tilting device for universal placement under almost any alternating air or foam mattress.

The gentle, slow and quiet 30 degree tilt from left to right, provides enhanced pressure and pain relief to those spending extended periods of time in bed and is used in hospitals, hospices, nursing and care homes as well as private residences.

3 WAY BENEFIT: RESIDENTS, CARERS & NURSING HOME OWNERS

- Easy to fit & operate
- Save on resident/patient discomfort and interruption
- Save on carer input and manual handling
- Ensure adequate and regular bed re-positioning
- Supportive along entire length of body
- Relieves tissue compression and improves blood and lymph flow
- Greatly reduces risk of pressure sores.
